EDUCATION

Babcock University, B.S. in Computer Science, GPA: 3.9 / 5.0

Jan 2022 - Jul 2025

Relevant Coursework: Data Structures & Algorithms, Object Oriented Programming, Numerical Methods & Analysis, Modelling & Simulations, Artificial Intelligence, Machine Learning, Operating Systems, Computer Architecture and Design.

TECHNICAL SKILLS

Programming Languages: Python, HTML, JavaScript, CSS, Node JS

Frameworks & Tools: React JS, Next JS, Fast API, Git/GitHub, MongoDB, Firebase, Restful APIs, Express JS

WORK EXPERIENCE

Hago Africa

Remote

Contract Software Engineer | React JS, React Native, Express JS, GraphQL, Git, Firebase

Sept. 2025 - Present

- Collaborate on Hago Africa's multi-platform system (Web, iOS and Android) that connects local vendors with customers across Africa.
- Contribute to both Frontend and Backend development, implementing new features, fixing bugs and optimizing performance across platforms.
- Work with React and React Native (Expo) and Node.js to enhance user experience and ensure seamless functionality between web and mobile apps.

Future Interns

Remote

Full-Stack Web Developer | React JS, Express JS, Next JS, MongoDB, Strapi

Sept. 2025 – Oct. 2025

- Built a dynamic portfolio web app using React, Express and MongoDB, enabling real-time updates for projects, experiences and skills through a connected database.
- Developed a Next.js e-commerce platform with Zustand for cart state management and MongoDB for product data, including a simulated checkout flow with mock payment validation.
- Recreated a modern fashion website integrated with Strapi CMS, managing dynamic content and product listings for an optimized, visually appealing user experience.

HiiT plc

Ikeja, LG

Cybersecurity Intern | Networking, Kali Linux, Metasploit

Jan 2024 – Jun 2024

- Completed hands-on cybersecurity training using Kali Linux, including practical use of Metasploit, Nmap and the aircrack-ng toolset for wireless security testing.
- Performed network reconnaissance, vulnerability scanning and basic exploitation in controlled lab environments to understand attack vectors and defensive mitigations.
- Configured and troubleshoot local area networks: LAN cabling, switches, routers, and connecting endpoints (laptops, printers) for reliable network topology and access.

PROJECTS

VOTR.io | MongoDB, React.js, Express JS, Tailwind,

Jan 2024 – May 2024

- Developing a full-stack web platform that allows users to create and share polls, quizzes, and surveys to collect real-time feedback.
- Designed an intuitive React frontend with dynamic question rendering and integrated a Node.js/Express backend connected to MongoDB for efficient data storage and analytics.

DocMate (In Progress) | FastAPI, React JS, Tailwind CSS, OpenAI API

Oct 2025 - Present

- Developing an AI-powered platform that helps generate professional README files for developers using React, FastAPI and OpenAI API.

LEADERSHIP

Final Year Project

Ilishan-Remo, OG

Team Lead / Lead Software Engineer

Sept 2024 – Apr 2025

- Led a team of three in developing a web-based platform that guides users interested in tech skills (e.g., web development, data analysis, and related fields) with structured learning roadmaps and curated resources.
- Oversaw project planning, task distribution and code integration while serving as the main developer, building the system using HTML, CSS, JavaScript and PHP.
